Keys to the Future

Potential Common Capabilities

- Airborne Instrumentation
- On-Board Missile Instrumentation
- Drone Control Systems
- Telemetry Systems
- Range Data Links
- Stimulators in Facilities
- Tools for Integrating Simulations & Live Systems
- Tools for Connecting Multiple Facilities & Ranges
- Data Processing and Display Software Modules
- Architecture
-
-
- (and many more)

Commonality Projects

- Airborne Instrumentation **CAIS**
- On-Board Missile Instrumentation **JAMI**
- Drone Control Systems **NGTCS**
- Telemetry Systems **ARTM**
- Range Data Links **FIRST**
- Stimulators in Facilities **JISTF**
- Tools for Integrating Simulations & Live Systems **VTTR**
- Tools for Connecting Multiple Facilities & Ranges **JRRC**
- Data Processing and Display Software Modules **CDAPS**
- Architecture **TENA**

Users

Testing

System Performance

Operator Proficiency

Training

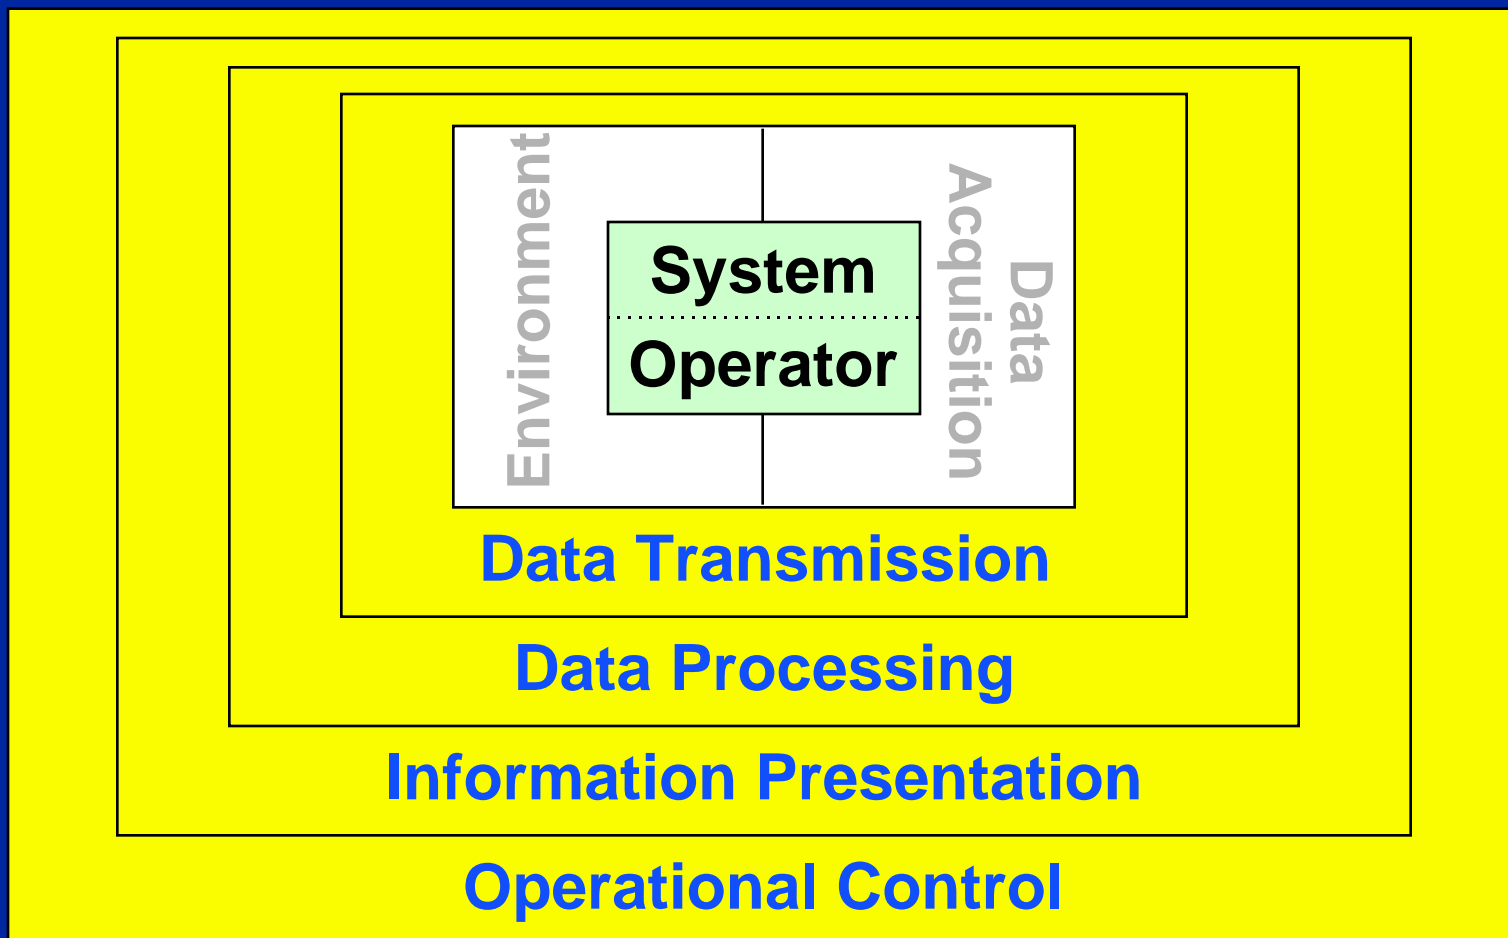

A Realistic Environment

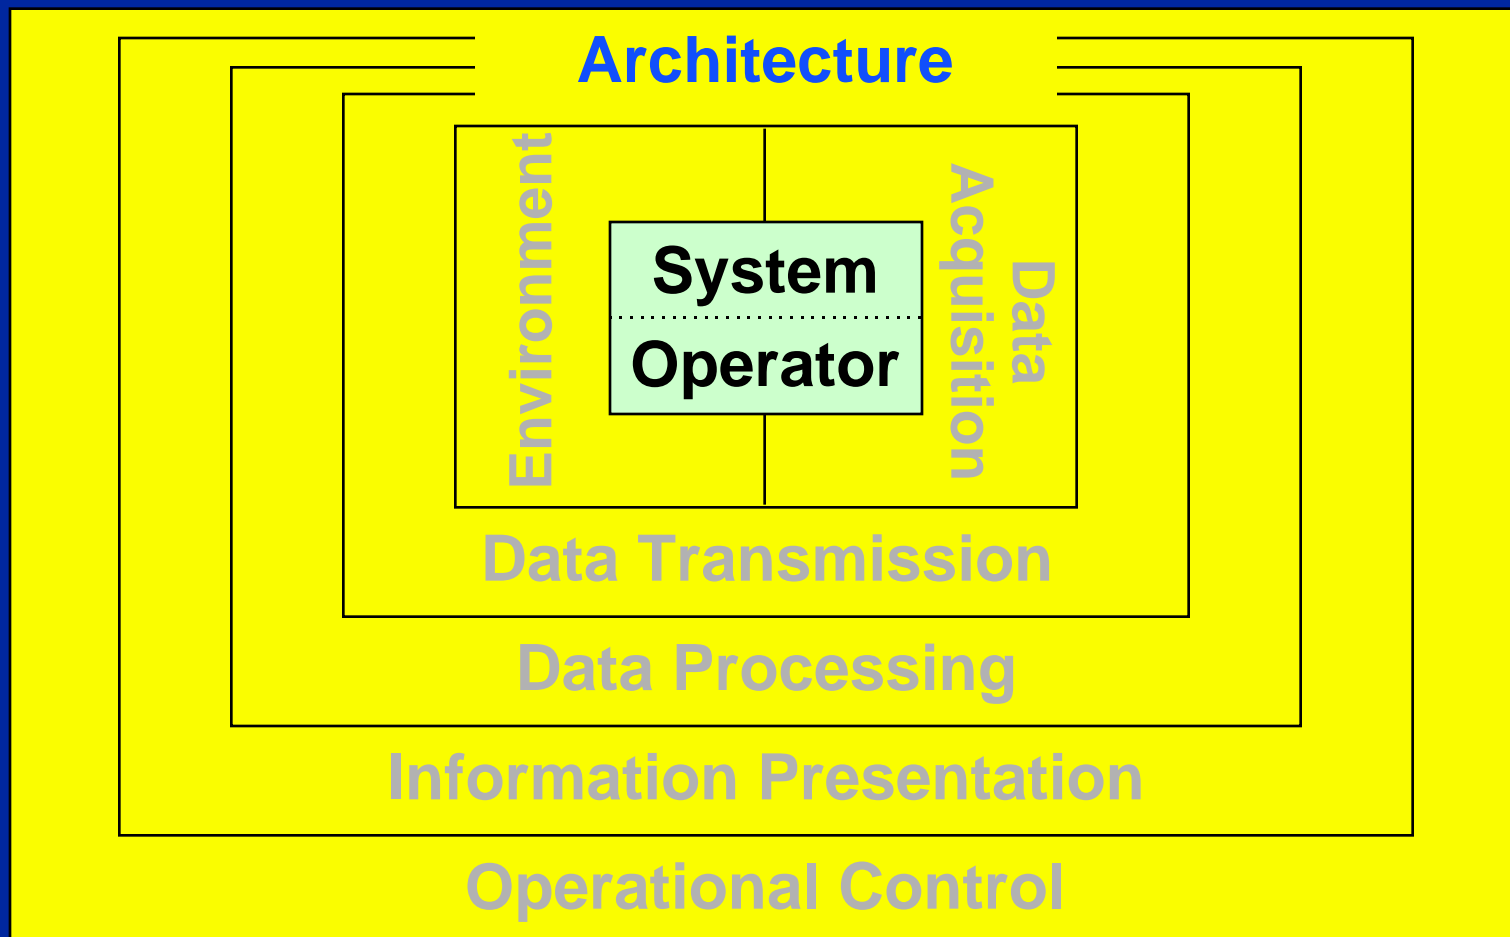

Data Acquisition

Outer Shells for Presentation and Control

Architecture

Same Functions, Different Worlds

Simulations

Testing / Training Ranges

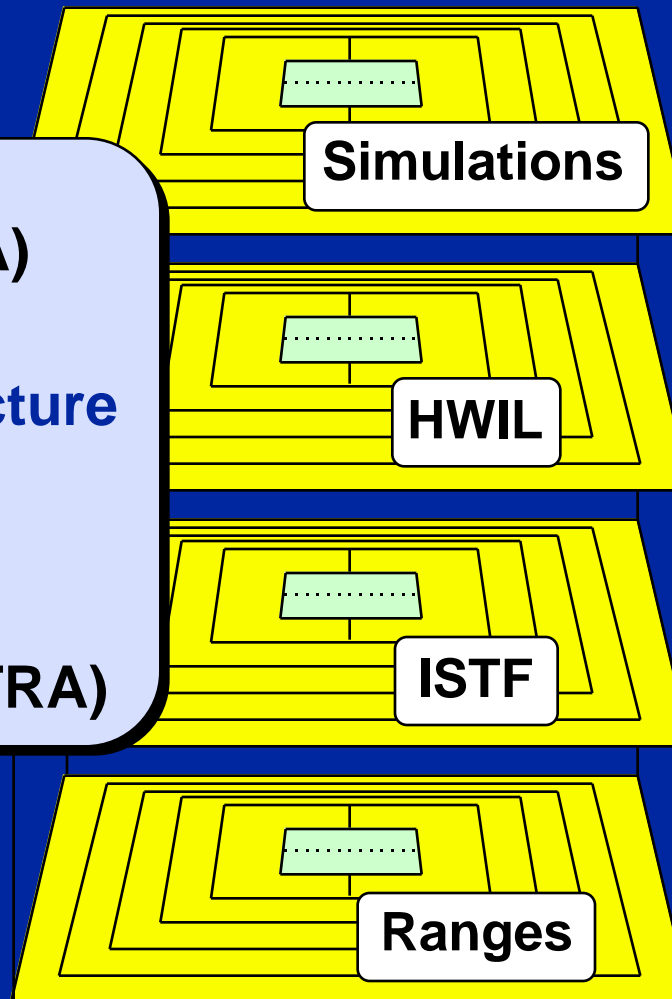

Hardware-in-the-Loop

Installed Systems Test Facility

A Common Architecture

- High Level Architecture (HLA)
- Test & Training Enabling Architecture (TENA)
- Common Test & Training Range Architecture (CTTRA)

JMASS

JSIMS

STAF

ACETEF

MRTFBs

Training

Common Control Tools

- Virtual Test and Training Range (VTTR)

JMASS

JSIMS

STAF

ACETEF

MRTFBs

Training

Common Productivity Enhancement Tools

- Joint Regional Range Complex (JRRRC)

JMASS

JSIMS

STAF

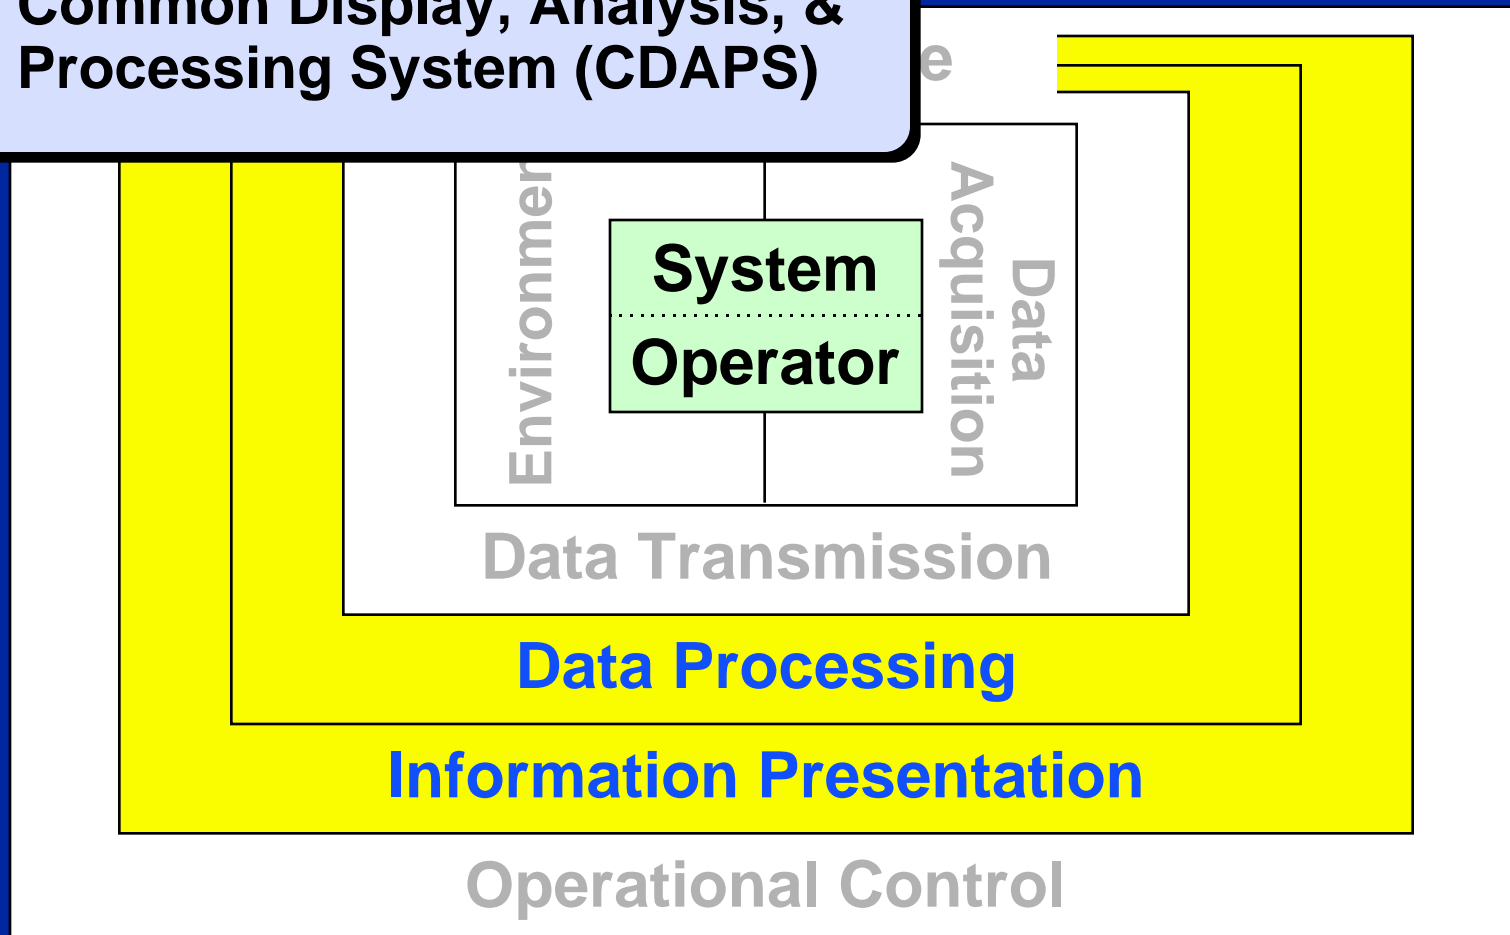

ACETEF

MRTFBs

Training

Common Software Modules

- Common Display, Analysis, & Processing System (CDAPS)

Summary Descriptions of the Programs

- **TENA**: Provide a common architecture
- **CDAPS**: Provide common software modules for data processing, analysis & display
- **VTTR**: Provide common resources to facilitate integration of simulations and live systems
- **JRRC**: Provide common tools to facilitate interlinking different ranges & facilities
